

More about the windsurf centre

The Windsurf Paradise Center is located directly by the sandy beach of Las Cucharas which is the main beach of the Costa Teguisé tourist resort. The tradewinds blow almost perfectly side shore from the left and with more power than elsewhere on the island.

Inside the sheltered bay the wind is lighter so that beginners and less experienced sailors enjoy easy conditions. Outside the bay, upwind, there is a massive reef where advanced sailors can enjoy wavesailing and get some airtime.

The position of the reef allows progression towards the impact zone. Depending on the conditions the reef can produce really big waves and believe us – a good day in Las Cucharas you’ll never forget!

At Windsurf Paradise we are a team from all over the world (English, German, French-Canadian, French…) and all of us are experienced instructors and still crazy for this sport.

Meet the team

We also take care of your safety out on the water having our own bay-watch-security-system and our rescue boat is available all the time.
